The Dominical Letter	G	Jan. 23. ends Feb. 12.
The Epistle	23.	Easter Term begins
Shrove-Sunday	Feb. 4.	April 11. ends May 7.
Easter-day	March 25	Trinity Term begins
Ascension-day	May 3.	May 25, ends June 13.

**Now, The Roman Account since the Year 1700**

is 11 days before us in *England*, their 12th being our first, and our last their 11th, and thus you are to understand the two Accounts, always reckoning the Forreign Account, when you read the News, to be 11 days before us, as for Example, *Paris*, *June* the 27th, this is but the 16th with us, and so observe in all the rest.

**Now, That the Exchequer opens eight days** before any Term begins, except *Trinity-Term*, before which it opens but four days. Observe also, that the first and last days of every Term are the first and last days of Appearance.

**The Eclipses 1722 are five, three of the Sun, and two of the Moon;** they happen as follows.

The first is of the *Sun*, on the 6th of *January*, at 11 in the morning; not visible, by reason of the *Moon's* great South Latitude, it will be seen only by the Southern Parts of the World.

The second is of the *Sun*, on the 2d of *June*, at 8 at night; it is also invisible here.

The third is a total and visible Eclipse of the *Moon*, on 18 of *June*, about 2 in the morning, 13 & half dig.

The fourth is of the *Sun*, *Nov.* 27th, about 3 in the afternoon; visible here if the Air's clear; ecl. 6 dig.

The fifth is a partial Eclipse of the *Moon*, *Decem.* 11th, about 4 in the afternoon; she rises about half eclipsed.

**A Table of all the Kings of England, since it was so called by King Egbert, to this Year 1722.**

On the Twelve Signs

The Princely *Ram*, clad in his golden Wool,  
 Looks back admiring to behold the *Bull*  
 Against him rise, who with a chearful Face  
 Calls to the *Twins*, to bid them mend their pace;  
 The *Crabb* these follows, and the *Lyon* then;  
 Next the *Cælestial Maid*, (not known by Man)  
*Libra* comes after, who (lest time should fail)  
 Weighs out the Days and Nights in equal Scale,  
 And calls the *Scorpion* on, who in his Train  
 Bears a bright fulgent Star, at which (in vain)  
 The *Centaur* (with his string drawn to his Ear)  
 Arms his keen Shaft; the *Goat* doth next appear,  
 That's *Capricornus* call'd, who oft-times lowres,  
 Because to quench his Star *Aquarius* powres  
 His Laver forth; next after him be plac'd  
*Pisces*, which of the twelve Signs is the last. *Manil. l. i. c. 4.*

**APRIL** Observations. Sow Barley, Hemp, and Flax, Pole Hops, set and sow all kind of Garden Herbs, open Hives, and let Bees labour for their living; let Tanners now provide them with Bark, and all good Housewives look to their Daries; bleed and purge with Advice: Those that are troubled with Aches or the Gout, let them go to the Bath in this or the three following Months.

**MAY** Observations. **OCTOBER** Observations. Sow Wheat and Rye, the sooner the better for fear of Rain, set Acorns and Nuts, gather Winter Fruits, the Weather dry, in the Afternoon, and in the wain of the Moon cut Rose-trees, if you desire to have store of Roses, do this once in two Years; refuse not any needful Physick at the Hands of the Learned, and use all moderate Sports to revive the vital Spirits.

PERKINS.

**DECEMBER** Observations. In this and the next Month, cut down Timber in the last quarter of the Moon, uncover the Roots of Fruit-trees, set Beans and Pease, cover all the best Flowers and Herbs from Frosts and Storms, with old rotten Horse-dung, look well to your Cattle, water and keep moist your Meadows, let Horses blood, and drink good Wine and strong Drink, keep thy Body warm clad, thy House warm and dry, cast all Care from you, and relieve those that are in Want, with thy Charity. Thus I have ended these Observations which are laid down for thy Advantage, make good use of them, and give God the Glory. *Vale.*

*A Description of the four Quarters of the Year; and first of Winter.*

*Sol in Capricorn, Aquarius, Pisces.*

**A** According to the custom of Writers in this kind, *Winter* quarter is the first quarter, which took beginning the 11 day of *December*, at which time the Sun enter'd into the first degree of the cold and dry Sign *Capricorn*, being the most remote from us, in his farthest *South* Declination causing the days with us to be shortest, and the Nights longest. This quarter continues until the Sun hath slowly passed through *Capricorn, Aquarius, & Pisces*, & doth naturally resemble *Old Age*.

*Of the Spring. Sol in Aries, Taurus, Gemini.*

**T**His quarter takes beginning near the 10 of *March*, at which time the Sun entereth into the first minute of *Aries*, making equal day and night; and continues whilst the Sun is passing through *Aries, Taurus* and *Gemini*. This quarter doth resemble growing *Youth*.

*Of Summer. Sol in Cancer, Leo, Virgo.*

**T**HE Summer-quarter doth take his beginning when the Sun enters into the first degree of *Cancer*, which will be this Year on the 10 of *June*, and continues whilst the Sun passeth through *Cancer, Leo, Virgo*. Now the Days are longest, and the Air hottest; therefore, but for necessity, bid *Physick* adieu.

*Of Autumn. Sol in Libra, Scorpio, Sagitarius.*

**A** Utumn, or Harvest-quarter (commonly called the *Fall* of the Leaf, of some the latter *Spring*) begins when the Sun enters into the first degree of *Libra*, again making the Day and Night of equal length, which will be this Year the 12 of *September*, and continues while the Sun passes thro' *Libra, Scorpio*, and *Sagitarius*. This quarter doth fitly resemble *Declining Age*, and *Phlegmatick* Complexion.
